

# MISSION RIDGE

Pictured on left is 2622 Queen Bed, 2625 Night Stand w/ Drawer, 2634 Dresser Mirror and the large 2628 Dresser. The Night Stand w/ Drawer and the Bed feature thru-tenon construction. The dresser has a secret compartment hidden behind the front panel with the carving. See photo below.

This collection features side guided drawer system considered to be the strongest available. Every layer of drawers is separated by a dust panel which is called "dust proofing".

**2627—7 Drawer Chest.** Features a secret compartment hidden behind the front panel w/ carving. A tall chest with a lot of storage. Side hung drawers will perform well even with a lot of weight.. One could actually stand in a drawer it is that strong.

Pictured above is the 2630 Chest, 2632 TV Cabinet, and the 2626 Bedside Chest. The bedside chest features a pullout just below the top. The chest and TV cabinet are typical of the Prospector Chest and TV Cabinet.

Another distinguishing feature of this collection is the thru-tenon construction of the bed and night stand w/ drawer. Thru-Tenon means the adjoining cross rail passes through the post and is pegged through the post and tenon to hold the tenon in place. This lost art is once again revived in this collection of Arts & Crafts furniture.

This exclusive collection is specially handcrafted by the craftsman of Borkholder Furniture at their facility in Napanee, Indiana. The MISSION RIDGE collection links the mission craftsmanship of the past with the styling of the 21st century. From the chiseled mortises to the hand rubbed finish, nothing compares to this quality.

**2629 Armoire**—is similar to the original Danaes Armoire and will provide a lot of storage for it's size. One stationary shelf is located just below center and two adjustable shelves give more storage options.
